Section 3. Approval of Plans, Specification and Construction. Prior to commencement of any construction, all proposed building plans, specifications, exterior color or finish, facade, roofing material, roof pitch, plot plans (showing the proposed location of such building or structure, drives and parking areas), and construction schedule shall be approved in writing by the ARB. Upon receipt of all required information and the Owner's written request for approval of his or her plans by the ARB, the ARB shall, within thirty (30) days from receipt, approve or disapprove the plans or request additional information; provided, however, that, if within the thirty (30) day period, the plans are not disapproved and no additional information is requested by the ARB, the plans shall be deemed to have been approved. Garages and other Accessory Structures (except those used for Equine housing) on any Lot must be constructed of the same or compatible materials as specified for the Dwelling constructed thereon. No alterations may be made in such plans after approval by the ARB except with the written consent of the ARB. No alterations in the exterior appearance of any building or structure shall be made without the written consent of the ARB. One copy of all plans and related data shall be retained by the ARB for its records. The exterior of all structures must be completed within one year after construction is commenced, except where such completion is delayed by strikes, fires, national emergencies or natural calamities.

Section 4. Architectural Standards. In addition to standards and considerations set forth elsewhere herein, the ARB may establish standards for the design, location, size, style, structure, color, mode of architecture, mode of landscaping, and relevant criteria deemed important to the ARB for the construction of any improvements. Disapproval of plans, location or specifications may be based upon any ground, including purely aesthetic considerations, which the ARB in its discretion deems sufficient. Each Owner shall be entitled to appeal any ARB decision to the BOD pursuant to procedures promulgated by the POA.

Section 5. Non-Liability for Approvals. The ARB's approval of plans shall not constitute a representation, warranty or guaranty, whether expressed or implied, that such plans and specifications comply with good engineering design or with zoning or building ordinances, or other governmental regulations or restrictions. By approving such plans and specifications, neither the ARB, nor BOD, nor POA, nor any members thereof assumes any liability or responsibility therefor or for any defect in the structure constructed from such plans or specifications. By disapproving such plans and specifications, neither the ARB, nor BOD, nor POA, nor any members thereof assumes any liability or responsibility for the cost of such disapproved plans and specifications or for the re-preparation thereof.
